

# PANEL HEATER.

---

## What's the best way to heat small rooms?

Heat pumps are the most energy efficient heating option for New Zealand homes, but it can be hard to justify the cost for every room.

---

## Panel heaters.

For smaller rooms slimline panel heaters with a thermostat and timer are a good option.

The Dimplex system also has WiFi so that you can set the heating to turn on and off to a schedule as needed.

---

## Dimplex Panel Heaters.

Dimplex Panel Heaters are made in Norway with a 7-10 year warranty. They are an affordable choice for bedrooms and smaller rooms and the options of castors make it portable and easy to move around.

They can regulate temperatures to within 0.3°C by constantly sampling the air temperature so the room temperature has little time to be able to drop.

---

## Dimplex "Energy Control" Kits.

The new Dimplex "Energy Control" Panel Heater Kits combine a number of Dimplex panel heaters with a WiFi hub, receivers for each heater and an App for your smartphone/tablet. The system creates a whole-home solution for tailored room by room comfort.

The benefits are:

- You can programme a schedule of heater operation room by room for "set and forget" operation or run the system manually with wireless remote control from your phone or tablet.
- With a programmed schedule you can set individual on-off times for each room to suit family sleeping schedules.
- Whether programmed or manual control, you can also set different temperatures for each room to suit the needs or preferences of different family members.
- Beyond what is programmed, you can change the settings remotely from your smartphone or tablet. This lets you turn on your heating while on your way home or turn it off to save money.

---

## Frequently asked questions.

---

### What's the advantage of a WiFi system?

WiFi for your Dimplex panel heaters is not a gimmick. By using an App on your phone you can:

- Pre-warm your house while by turning it on from your phone on your way home.
- Programme all your heaters to turn on 30 minutes before the family wakes.
- Check heaters are off from your phone and avoid wasting power.

---

### How does Dimplex create whole home heating?

By combining efficient panel heaters in each room with a control hub you can programme the heating for your home to turn on and off as you need.

---

### Is Dimplex's Energy Control System suitable if I'm renting?

Yes. The panel heaters can be put on castors instead of screwed to the wall and the hub just plugs into your wireless router.

---

## We've got trained and experienced teams.
